

**REMARKS**

The present application now contains claims 2, 3, 5, 6, 8-13, 15-19, 21-28 and 33-36. Claims 1, 4, 7 and 29-32 are canceled herewith. Claims 14 and 20 were canceled previously.

In the above referenced office action, the Examiner indicated that claims 8 and 33 contain patentable subject matter. The present amendments, place claims 8 and 33 in independent form and make all the remaining claims dependent on these two claims.

The Examiner has also required that an abstract on a separate sheet be submitted. An abstract on a separate page is not required in national stage PCT applications (see MPEP §1893.03(e)). As indicated in the last paragraph of the section titled "THE PAMPHLET", the abstract printed on the front page of the pamphlet is used in a US Patent that results from the application and it is improper to require an abstract on a separate piece of paper. Withdrawal of the requirement is respectfully requested.

In response to Examiner's objection to the drawings, applicants cancel claim 29 and file a corrected set of drawings. The specification was amended to reflect the correction to the drawings.

In view of the above, applicants submit that application is ready for allowance. Notice to that effect is respectfully solicited.

Respectfully submitted,  
A. SHMAISER, et al.
